Behavioral contract (written at deployment)
re-breach reopens Phase 1
escalate tier
1. Trigger
2. Cause Attribution
3. Intervention Plan
4. Remediation Window
5. Exit Evaluation
Two gates: effect size ≥ kσ AND Benjamini–Hochberg significance; absolute floor + relative drift
Disaggregation signature + MAST labels, frozen mapping; returns failure mode or abstains
Tier 1 prompt, Tier 2 retrieval/context, Tier 3 model-level
Bounded window; check-ins at 25%, 50%, 75%; early escalation if no improvement
Envelope re-measured, not intervention log
Exit outcomes:
Resolved
Regressed
Recalibrated
Retired
Timeout
APIP record: declarative schema (contract_id, mapping_table_sha256, exit_outcome)
